

Did you know...*

*...that **brain tumors** are the leading cause of cancer-related death in children, yet one of the least-funded areas of cancer research?*

*...that **DIPG**, diffuse intrinsic pontine glioma, is responsible for **80% of pediatric brain tumor deaths**, has **no survivors**, yet like most childhood cancers is marginalized as 'rare' and thus undeserving of research funding?*

*...that only **4%** of the National Cancer Institute's (NCI) annual budget for research benefits children's cancer research?*

*That said, after accidents and injury, **cancer is the leading cause of death in children?***

Awareness is powerful.

'May light and hope one day replace despair and grief at diagnosis for DIPG children and their families.'
