

## Finding Solutions for Children with DIPG (diffuse intrinsic pontine glioma)

Keynote Speaker:

Dr. Charles Keller, Scientific Director

Children's Cancer Therapy Development Institute, Beaverton, OR

# What if Jack were your child?

The Encino **WFG** office and **Suzan Gault** will be hosting a charity event in hopes to raise awareness and donations for **D.I.P.G** (Diffuse Intrinsic Pontine Glioma). **Jack's Angels** founder, **Janet Demeter** will be speaking about her **501c3** Charity, **DIPG** and her son Jack who lost his battle July 30th, 2012.

**DIPG** is a tumor always found in the brainstem formed by cells called glia that surround, protect and support the nerve cells in the brain. This part of the brain controls many functions like breathing, swallowing and muscles that help with speech and eye movements.

It's most common in elementary school-aged children. About 250 kids in the U.S. are diagnosed with **DIPG** each year.

- There is **NO** cure
- This cancer is **100% fatal**
- This foundation **needs donations** for research

The WFG Foundation will contribute **MATCHING** donation dollars!
